bytes brothers

explore the intelligence

TECHNOLOGY · DIGITAL SOLUTIONS · CONSULTING

We build software that moves your business forward.

Web platforms, SaaS products, mobile and desktop apps, and practical AI — designed, built and supported from Chennai, for clients worldwide.

Company Profile

2026 · BYTESBROTHERS.COM

WHO WE ARE

Built by experts, driven by results.

Since 2010, Bytes Brothers Technology has been turning real business challenges into dependable digital solutions through a unique blend of creativity, knowledge and technology. Our team of dedicated, enterprising professionals delivers and supports reliable, cost-effective software for clients worldwide.

01 What we do

Custom web applications, SaaS platforms, e-commerce, mobile and desktop apps. We also bring AI into your products and day-to-day workflows — in ways that actually save time.

02 How we think

We get the scope clear before we quote. We ship a working first version early, so you see value fast — then we refine it into a polished product.

03 Who we work with

Growing businesses, agencies and founders in India, the USA, the UK, Canada, Australia, Malaysia and the Middle East — from healthcare and law firms to logistics, property and temples.

04 Why it works

You talk directly to the people building your product. Clear communication, complete documentation, and support that doesn't stop at launch.

Since 2010
Chennai-based; private limited company since 2014, GST-registered

Global clients
India, USA, UK, Canada, Australia, Malaysia and the Middle East

Own products
We build and run our own software, not just client work

Multilingual
Websites in English, French, Tamil and more

STRENGTH	STRENGTH	STRENGTH	STRENGTH	STRENGTH
Commitment to quality	Design & usability first	Smooth communication	Complete documentation	Dedicated, skilled team

> "Technology keeps changing. Our promise doesn't — honest advice, solid engineering and support you can count on, project after project."

UNDERSTAND CLIENT NEEDS · PARTNER WITH CLIENTS · EARN TRUST & CONFIDENCE

WHAT WE BUILD

Services

From a simple website to a complete business platform, our team builds it, launches it and supports it for the long run.

01

Custom Web Applications

Business portals, dashboards, ERP and CRM modules — built around how your team actually works.

Laravel · CodeIgniter · MySQL

02

SaaS Products & MVP Development

Launch a working MVP fast, then grow it into a full SaaS — subscriptions, user roles, dashboards and APIs.

Laravel · Next.js · MVP

03 SPECIALITY

Multilingual Websites

Fast, SEO-friendly websites in English, French, Tamil and more — every language properly translated, indexed and easy to edit.

Next.js · WordPress · Multilingual SEO

04

E-commerce (B2B & B2C)

Online stores and catalogues with bulk ordering, quotes, payments and GST invoicing.

WooCommerce · Laravel · UPI

05

AI Integration & Implementation

Smart assistants, document and data processing, AI search and automated workflows — added safely to your software and daily work.

LLM APIs · AI assistants · Automation

06

Mobile Apps

Cross-platform apps for Android and iOS, and native Android apps with reliable background work.

Flutter · Kotlin · iOS & Android

07

Desktop Software

Offline-first Windows apps with auto backup, cloud sync and licence activation.

Tauri · PHP · SQLite

08

API & Systems Integration

Connect payment gateways, UPI, accounting and other services so your systems work together.

REST APIs · Webhooks · Payments

09

Hosting, Monitoring & Support

Managed VPS hosting, SSL, uptime and domain monitoring, bug fixes and upgrades.

Linux VPS · AWS · SSL

OUR EXPERTISE

Technology stack

Modern, proven and open-source first. We pick the right tool for the job — not the trendiest one — so your software stays easy to run and affordable to maintain.

Core stack

What most of our projects are built on

Laravel	CodeIgniter	Next.js	Flutter / Kotlin	Tauri
SaaS & APIs	Business apps	Web front ends	Mobile apps	Desktop apps

Back end

APIs, business logic, integrations

PHP · Laravel · CodeIgniter · Spatie packages · Node.js · Python · REST APIs · Webhooks

Front end

Websites, dashboards, web apps

Next.js · React · JavaScript · HTML5 · CSS3 · Bootstrap · Multilingual / i18n

Mobile & desktop

Native and offline-first apps

Flutter · Dart · Kotlin · Android · iOS · Tauri · Licence activation

CMS & commerce

Content and online selling

WordPress · Headless WordPress · WooCommerce · WHMCS

Databases

Cloud and local data

MySQL · PostgreSQL · SQLite · MSSQL

AI & integrations

Smarter software, connected systems

LLM integration · AI assistants & agents · Document & data AI · AI-assisted development · Payment gateways · UPI QR · Aadhaar eKYC

Cloud & DevOps

Hosting, security, uptime

AWS · Linux VPS · Apache · CWP Pro · SSL & DNS · Git · Uptime monitoring

IoT & hardware

Prototypes and sensor apps

ESP32 · Arduino · Bluetooth LE · Health & motion sensors

Growth

Getting found online

SEO · Social media (SMO) · PPC

BUILT BY US

Our products

We don't just build for clients — we build and run our own software. That keeps our skills sharp and our advice practical.

WEB · MOBILE

Aurupa

Jewellery savings scheme software

Digital gold and jewellery savings schemes for jewellers. Customers join a plan, pay their monthly instalments and track their savings — on the web or from their phone.

- Scheme plans and customer enrolment
- Monthly instalment tracking
- Online payments with UPI
- Payment reminders to customers
- Maturity and redemption
- Customer mobile app

`Web app` `Mobile app` `UPI payments`

IN DEVELOPMENT

DomainBuzzer

Website & domain monitoring

One dashboard that warns agencies before a client's domain expires, an SSL certificate lapses or a site goes down.

- Domain expiry alerts
- SSL certificate checks
- Uptime monitoring
- Connects with MainWP

`Laravel` `Next.js` `Spatie`

COMING TO GOOGLE PLAY

BatteryBytes

Android battery companion

Alerts you the moment your phone finishes charging — to prevent overheating and protect long-term battery health.

- Charge-complete and low-battery alerts
- Reliable background monitoring
- Charge history (planned)
- Per-app battery drain (planned)

`Kotlin` `Android`

GoBytes & GoSpacia

Our hosting brands — managed web hosting, domains and SSL for businesses.

R&D · HARDWARE

Bytes Labs · IoT

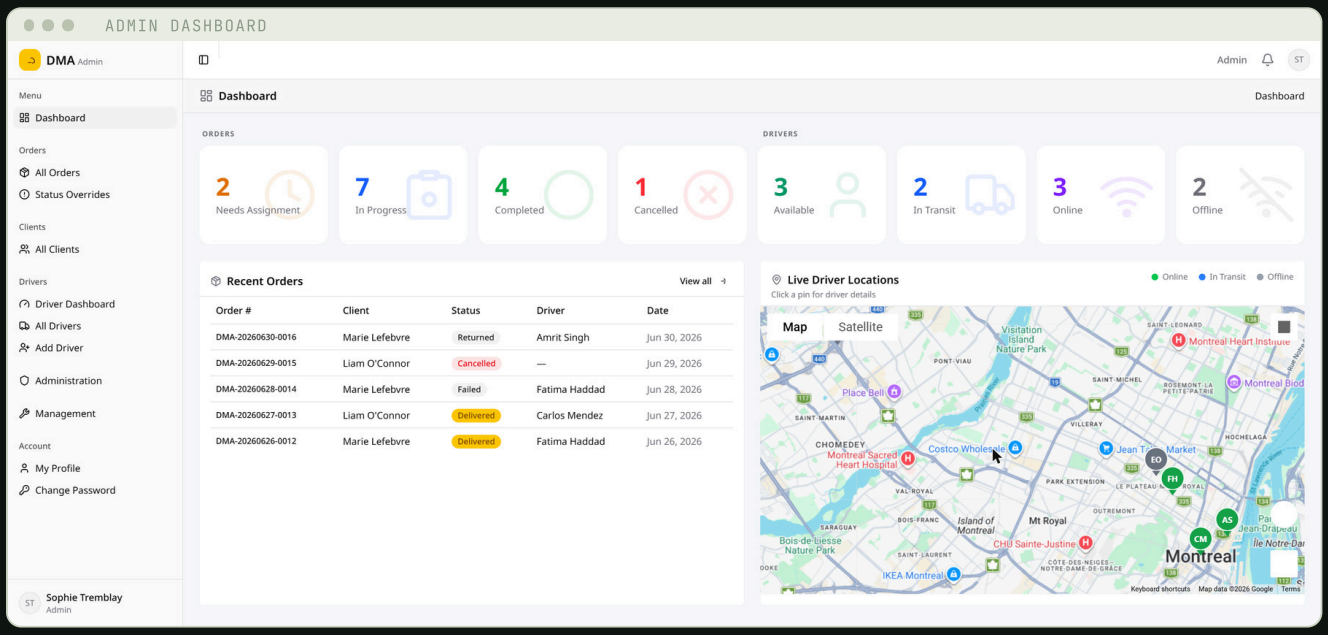

ESP32 prototypes for wearable health sensing — heart rate, SpO_2, motion and sleep.

CASE STUDY

VGT App — deliveries, managed end to end.

CLIENT VG Transport / LOCATION Montréal, Québec, Canada / PLATFORM Web + mobile

A complete delivery platform for a Québec courier. Customers book deliveries online, dispatchers assign and track every job on a live map, and drivers complete each delivery from their phone — with photo, name and signature as proof.

Customer portal

Book deliveries in a few steps, save addresses and track every order.

Dispatcher console

Assign jobs, watch drivers live on the map and manage order status.

Admin panel

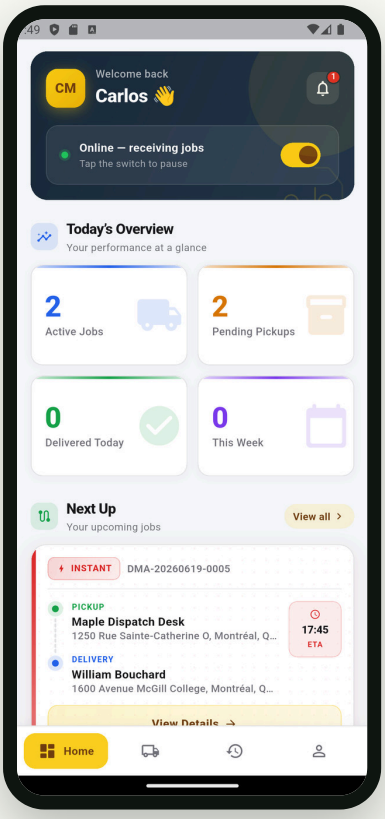

Roles, service and package types, reports with Excel export and activity logs.

Driver app

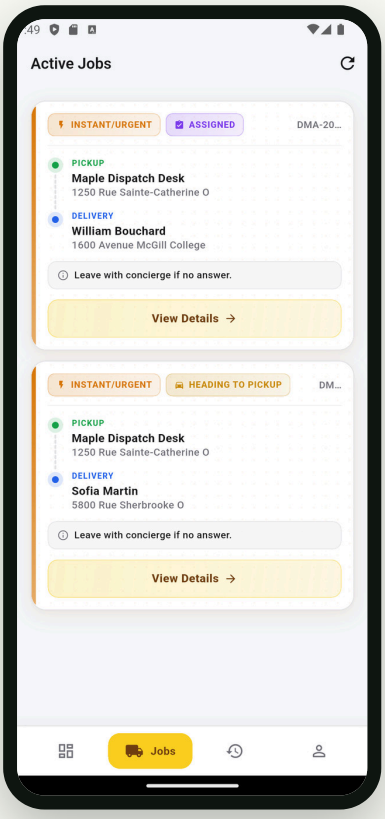

Jobs, navigation and proof of delivery — on the App Store.

Every delivery, in the driver's pocket.

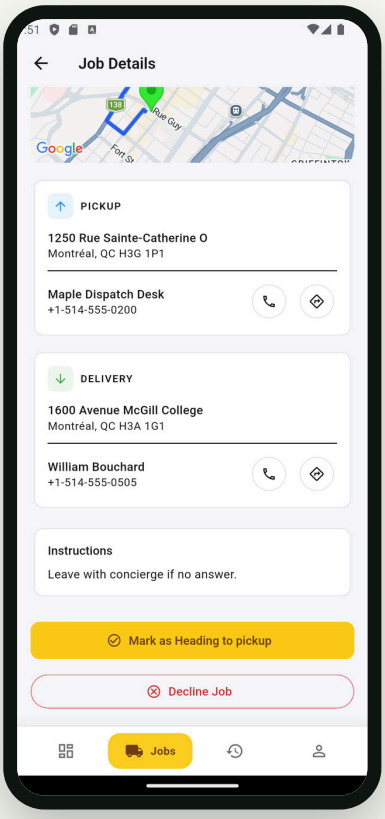

Drivers go online with one tap, receive jobs, and move each delivery from pickup to proof of delivery — while dispatch sees them live on the map.

HOME & TODAY'S JOBS

ACTIVE JOBS

JOB DETAILS & NAVIGATION

- One-tap online / offline
- Pickup code to confirm the right parcel
- Step-by-step status, pickup to delivered
- Call contacts and open directions in one tap
- Proof of delivery: photo, name and signature
- Québec 511 road alerts on the route
- Instant alerts for newly assigned jobs
- Live location shared with dispatch

4	Live	Photo + sign	App Store
apps in one platform	GPS driver tracking	digital proof of delivery	VGT Driver is live

HOW WE WORK

Clear scope. Early wins. No surprises.

An agile process with a client review at every key stage. You always know what's done, what's next and what it costs.

01

Discover

We ask the right questions first, so the quote matches the real effort — no nasty surprises later.

02 CLIENT REVIEW

Prototype

Clickable mock-ups and screen flows. You see the product before a line of code is written.

03

Build

Short sprints with regular demos. Clean, documented code that any good developer can pick up.

04 CLIENT REVIEW

Test

Functional, usability, security, performance and user-acceptance testing before launch.

05

Launch

Deployment, SSL, monitoring and backups set up properly from day one.

06 ONGOING

Support

Bug fixes, enhancements, upgrades and on-call help — we stay with you after go-live.

PHASE 1

Ship a working version fast

A simpler first release that solves the core problem and starts earning value early.

PHASE 2

Polish and scale

Real-user feedback shapes the full product — better UX, more features, more scale.

Quality built in

- Code reviews
- Functional & regression
- Usability & accessibility
- Security testing
- Performance testing
- Defect tracking
- UAT

Engagement models

Fixed price

Clear scope, fixed cost and timeline.

Time & material

Flexible scope; pay for the hours used.

Milestone billing

Pay as each agreed milestone is delivered.

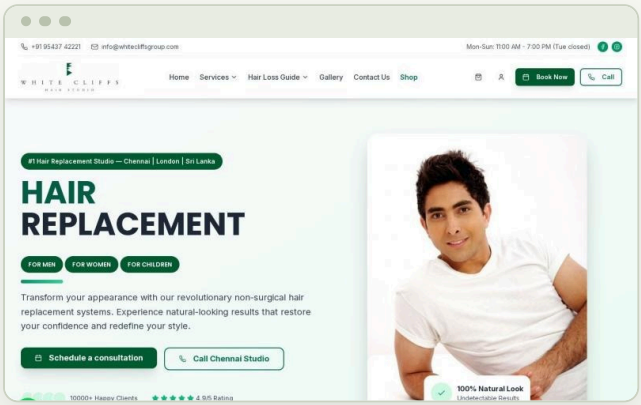

Dedicated team

Your own developers, working your hours.
